**O. ANY OTHER RELEVANT INFORMATION** Nil

#### **P. SUMMARY OF CONTRIBUTION TO KNOWLEDGE**

My contribution relates to reduction of stress in the workplace most especially for nurses working on various hospital wards. The need for them to devise means in which their daily routine activities care given to the patients can be done without themselves getting injured in the course of doing these various procedures, this will help prevent them from becoming a patient themselves (paper II). In our study, it was discovered that more than half of the patients had poor psychological experience with diabetic care, even though majority had satisfaction with the diabetic care, but with demonstration of poor quality life. So, advice on the aspect of promotion of psychological well being and quality outcome of diabetic care was given to the patients (paper III). In
